- In this maven dependencies below, you have the JPA,H2 database, PostgreSQL, springboot validation and spring boot security

```xml
<dependency>
        <groupId>org.springframework.boot</groupId>
        <artifactId>spring-boot-starter-data-jpa</artifactId>
</dependency>

<dependency>
        <groupId>com.h2database</groupId>
        <artifactId>h2</artifactId>
        <scope>runtime</scope>
</dependency>

<dependency>
        <groupId>org.postgresql</groupId>
        <artifactId>postgresql</artifactId>
        <scope>runtime</scope>
</dependency>

<dependency>
        <groupId>org.springframework.boot</groupId>
        <artifactId>spring-boot-starter-validation</artifactId>
</dependency>

<dependency>
        <groupId>org.springframework.boot</groupId>
        <artifactId>spring-boot-starter-security</artifactId>
</dependency>
```
- Open the pom.xml file in STS

- Search for the dependencies

```xml
<dependencies>
    <dependency>
        <groupId>org.springframework.boot</groupId>
        <artifactId>spring-boot-starter-web</artifactId>
    </dependency>

    <dependency>
        <groupId>org.springframework.boot</groupId>
        <artifactId>spring-boot-starter-test</artifactId>
        <scope>test</scope>
        <exclusions>
            <exclusion>
                <groupId>org.junit.vintage</groupId>
                <artifactId>junit-vintage-engine</artifactId>
            </exclusion>
        </exclusions>
    </dependency>
</dependencies>
```
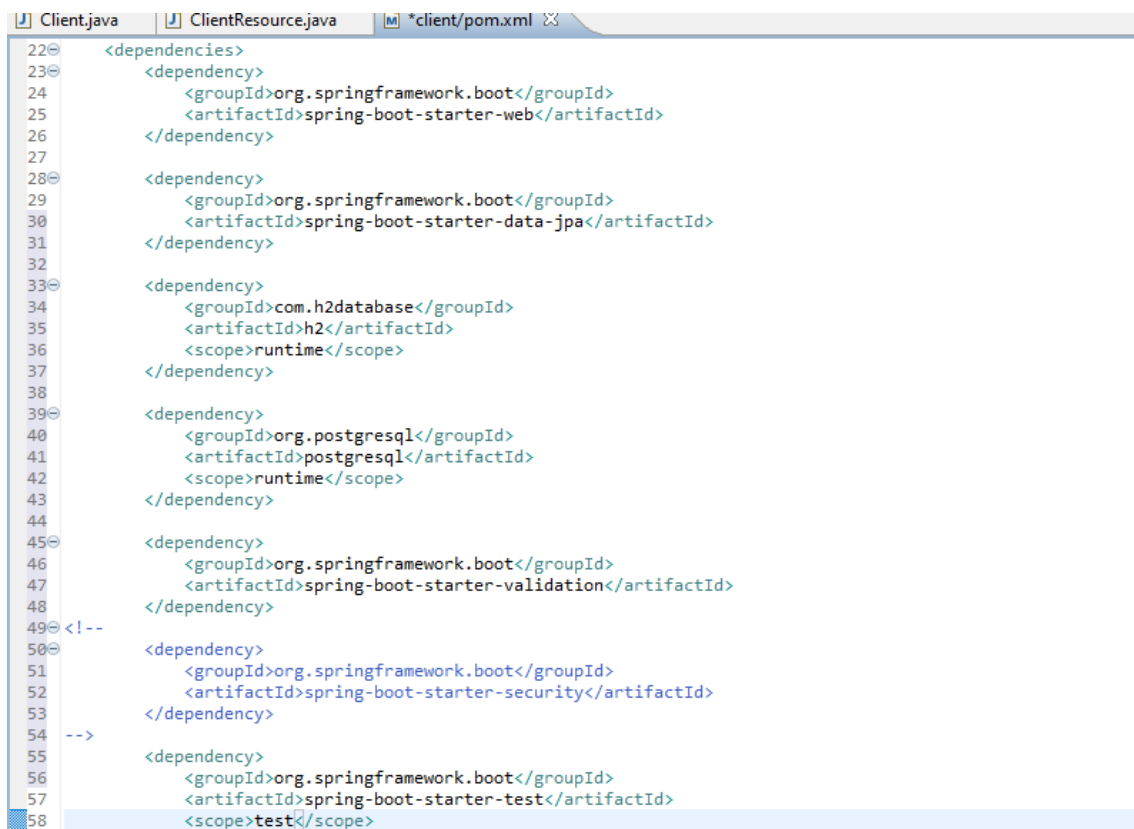

- Now, you have to put the dependencies between the <dependencies> statemant

```xml
22  <dependencies>
23      <dependency>
24          <groupId>org.springframework.boot</groupId>
25          <artifactId>spring-boot-starter-web</artifactId>
26      </dependency>
27
28      <dependency>
29          <groupId>org.springframework.boot</groupId>
30          <artifactId>spring-boot-starter-data-jpa</artifactId>
31      </dependency>
32
33      <dependency>
34          <groupId>com.h2database</groupId>
35          <artifactId>h2</artifactId>
36          <scope>runtime</scope>
37      </dependency>
38
39      <dependency>
40          <groupId>org.postgresql</groupId>
41          <artifactId>postgresql</artifactId>
42          <scope>runtime</scope>
43      </dependency>
44
45      <dependency>
46          <groupId>org.springframework.boot</groupId>
47          <artifactId>spring-boot-starter-validation</artifactId>
48      </dependency>
49  <!--
50      <dependency>
51          <groupId>org.springframework.boot</groupId>
52          <artifactId>spring-boot-starter-security</artifactId>
53      </dependency>
54  -->
55      <dependency>
56          <groupId>org.springframework.boot</groupId>
57          <artifactId>spring-boot-starter-test</artifactId>
58          <scope>test</scope>
```

- When you save, the STS will make the download of the dependencies.
